

Nicole Cohen  
Bachelor's Student, Landscape Architecture  
Rutgers, The State University of New Jersey

Nicole Cohen is a fourth year undergraduate student at Rutgers University, studying Landscape Architecture. She is interested in ecological rehabilitation, particularly in post-industrial landscapes. Nicole plans on completing her master's degree at Rutgers University as well, through the Landscape Architecture Department's 4+1 program. After college, Nicole would like to become a licensed Landscape Architect, and focus her design work on creating sustainable landscapes.

Currently, Nicole is president of the New Jersey Student Chapter of the American Society of Landscape Architects. In the past, she has worked at Central Park Conservancy as a Horticulture Intern. This summer, under the guidance of professors Frank Gallagher and Jason Grabosky, Nicole will be conducting research at both Liberty State Park and Freshkills Park. The main focus of the project will be analyzing the soils of both sites and developing a new soil index method.
